Open Ended Questions (FRQ)

Q9. Tom's house is 8 miles away from the city center. What is the absolute value of the distance between his house and the city center?

Q10. Explain the concept of absolute value in the context of a number line and provide an example. Be sure to define absolute value and include a simple calculation.

Chef's Tips

- Emphasize that absolute value represents the distance from zero on the number line.
- Remind students that the absolute value of any number is always non-negative.
- Suggest using number lines to visualize and solve absolute value problems
