Open Ended Questions (FRQ)

- Q9.** A company has 20000 to invest in two projects. The expected rate of return for Project A is 12% and for Project B is 15%. If the company invests x of its budget in Project A, how much will they expect to gain in total after one year? Show your work and calculate the expected gain.
- Q10.** A bank offers two savings accounts. Account A has an annual interest rate of 3% and Account B has an annual interest rate of 5%. If a customer deposits 1000 into Account A and 2000 into Account B, how much will they have in total after 3 years? Assume the interest is compounded annually and calculate the final amount.

- Chef's Tips: Always check the units of the answer.
- Chef's Tips: Make sure to read each question carefully and identify the key elements.
- Chef's Tips: Use the given information to set up equations and solve for the unknown.
