

Homework (Jalapeno)

Open Ended Questions (FRQ)

Q9. A medieval alchemist had two flasks of liquid: one contained 30

Q10. A collection of 25 ancient scrolls contained a mixture of 20 mathematical and 5 non-mathematical texts. New scrolls were added, and the resulting collection had 32

Chef's Tips

1

- Remind students to show calculations for free-response questions
- Check that students are using the correct units for their answers
- Allow students to use calculators for calculations, but not for multiple-choice questions
