

Homework (Jalapeno)

Open Ended Questions (FRQ)

Q9. The value of an ancient coin increased from

200

to

280

. Calculate the percent increase in its value and show your work. Provide your answer as a percent.

Q10. A historical monument's height decreased from 150 meters to 120 meters due to erosion. What percent decrease occurred? Show your calculation and provide the percent decrease as the final answer.

Chef's Tips

1

- Remind students to read each question carefully and choose the correct units.
- Emphasize the importance of calculating the percent increase or decrease accurately.
- Encourage students to use different methods, such as proportions or decimals, to solve percent problems.
