Open Ended Questions (FRQ)

- Q9.** A camper needs to mix 2 parts of water to 1 part of food to make a trail snack. If she uses 6 cups of water, how many cups of food will she need? Show your work and explain your reasoning.
- Q10.** A national park has a deer population that is increasing at a rate of 5

Chef's Tips

1

- Emphasize the importance of labeling and unit conversion in word problems
- Encourage students to use proportions to model real-world situations
- Remind students to check their units and ensure they are consistent throughout the problem
