

Challenge (Habanero)

Open Ended Questions (FRQ)

Q9. A park ranger estimates that a deer population grows at a rate of $\sqrt{52}$ per day. What is the rationalized form of the expression for the population growth in $\sqrt{3}$ days?

Q10. What is the rationalized form of $2\sqrt{3} + 1\sqrt{10} - \sqrt{5}$? Show your work and explain your reasoning.

Chef's Tips

- Have students show their work and explain their reasoning.
- Encourage students to use calculators to check their answers.
- Remind students to rationalize denominators involving radicals.
