

Open Ended Questions (FRQ)

Q9. A construction project requires x workers to complete in y days, where the relation between x and y is given by the equation $y = \frac{10}{x}$.

Find the domain and range of this relation and explain why it is or is not a function.

Q10. A chef has a recipe for cake that requires x cups of flour to make y cakes, where x and y are related by the equation $y = 2x - 3$. Find the value of y when $x = 4$ and explain the meaning of the result in the context of the problem.

Chef's Tips

- 1
- Tip 1: Use the vertical line test to determine if a relation is a function.
 - Tip 2: Check the units of measurement when evaluating functions.
 - Tip 3: Use function notation to evaluate functions.
