

Quiz (Habanero)

Open Ended Questions (FRQ)

Q9. A city's temperature T in degrees Celsius is related to the time t in hours by $T = 2t - 5$. Find the inverse relation and interpret its meaning in the context of the problem.

Q10. The population P of a certain species of fish is related to the amount of food F available by $P = \frac{F}{F+10}$. Find the inverse relation and use it to determine the amount of food needed to support a population of 200 fish.

Chef's Tips

1

- Make sure students understand the concept of inverse functions and how to find them algebraically.
- Emphasize the importance of verifying inverses using composition.
- Encourage students to interpret inverses in real-world contexts.
