Open Ended Questions (FRQ)

Q9. The distance d an athlete runs is related to the time t by the function $d = 3t + 2$. Find the inverse function and interpret its meaning in the context of the problem. Show all your work.

Q10. The score s a team achieves is related to the number of goals g by the function $s = 2g - 5$. Determine if this function has an inverse. If so, find the inverse function. Verify your answer using composition. Provide a real-world interpretation of the inverse function.

Chef's Tips

- Read each question carefully and choose the correct answer.
- Show all work for free-response questions.
- Use a pencil to fill in the answer bubbles and write your answers.
