

Quiz (Carolina Reaper)

Open Ended Questions (FRQ)

Q9. A transportation company has x vans and y trucks. The vans travel at an average speed of 40 miles per hour, while the trucks travel at an average speed of 60 miles per hour. If the company wants to increase the average speed of the entire fleet by 10

Q10. A delivery company has a 15-mile route with 3 traffic lights. The first traffic light is 3 miles from the starting point, the second is 5 miles from the first, and the third is 7 miles from the second. If the delivery truck travels at 30 miles per hour and stops for 2 minutes at each traffic light, what is the average speed for the entire route? Show your work and calculate the average speed.

Chef's Tips

1

- Tip 1: Make sure students show their work and calculations for each problem.
- Tip 2: Encourage students to use diagrams and visual aids to help solve the problems.
- Tip 3: Remind students to check their units and ensure they are consistent throughout the problem.
