

Homework (Habanero)

Open Ended Questions (FRQ)

Q9. A hospital is using a new medication that has a dosage of 3^{n-2} milligrams. If the initial dosage is 9 milligrams, what is the value of n ? Show your work and explain your reasoning.

Q10. The growth rate of a cell culture is modeled by the equation $P = 2^{t+1}$, where P is the number of cells and t is the time in hours. If there are 16 cells after 2 hours, does the model accurately predict the growth rate? Use mathematical evidence to support your answer.

Chef's Tips

- Chef's Tips
- Provide clear and concise explanations
- Encourage students to show their work and explain their reasoning
