

Quiz (Habanero)

Open Ended Questions (FRQ)

Q9. A line passes through the points $(1, 2)$ and $(3, 4)$. Find the equation of a line that is perpendicular to this line and passes through the point $(2, 3)$.

Q10. In a certain ecosystem, the relationship between the temperature T (in $^{\circ}\text{C}$) and the amount of rainfall R (in mm) can be modeled by the equation $R = 2T + 5$. Find the equation of a line that is perpendicular to this line and passes through the point $(1, 7)$.

Chef's Tips

- Tip 1: Encourage students to use graph paper to visualize the lines.
- Tip 2: Remind students to check their work by plugging in points to the equations.
- Tip 3: Suggest that students work in pairs to check each other's work.
