## Open Ended Questions (FRQ)

**Q9.** Graph the inequality  $y > \frac{1}{2}x - 1$  and identify the solution region. Provide at least 3 test points to verify your solution.

**Q10.** A gymnast's score  $y$  is determined by the equation  $y \leq 3x + 2$ , where  $x$  is the level of difficulty. Graph this inequality and find the solution region. What is the lowest possible score a gymnast can achieve if the level of difficulty is  $x = 2$ ?

## Chef's Tips

- Tip 1: Emphasize the importance of dashed and solid boundary lines.
- Tip 2: Use real-world examples to illustrate the concept of linear inequalities.
- Tip 3: Encourage students to use graph paper when solving problems.
