

Foundation (Jalapeno)

Open Ended Questions (FRQ)

Q9. Graph the system $y = 2x - 1$ and $y = x + 2$. Find the point of intersection and explain its significance in the context of a space mission.

Q10. Solve the system $x + 2y = 8$ and $3x - y = 5$ using graphing. Interpret the solution in the context of a lab experiment involving two variables.

Chef's Tips

- Tip 1: Ensure students understand the concept of intersection points.
- Tip 2: Emphasize the importance of accurate graphing.
- Tip 3: Encourage students to interpret solutions in the context of real-world scenarios.
