

Quiz (Carolina Reaper)

- Q1.** A logistics company has 5 delivery trucks with the following travel times (in hours) to a warehouse: 2, 3, 4, 5, 6. What is the travel time?
(A) 3
(B) 4
(C) 5
(D) 3.5
(E) 4.5
- Q2.** A shipping company has the following package delivery times (in minutes): 10, 12, 15, 18, 20. What is the delivery time?
(A) 10
(B) 12
(C) 15
(D) No mode
(E) 20
- Q3.** The average speed of 7 cars on the highway is 60 miles per hour. If one more car with a speed of 70 miles per hour is added, what is the new average speed?
(A) 60
(B) 61
(C) 62
(D) 63
(E) 65
- Q4.** A traffic flow study records the following number of cars passing through an intersection per hour: 50, 60, 70, 50, 60. What is the number of cars per hour?
(A) 55
(B) 56
(C) 58
(D) 60
(E) 58
- Q5.** The times (in minutes) for 9 flights to arrive at an airport are: 20, 25, 30, 20, 25, 30, 20, 25, 35. What is the arrival time?
(A) 20
(B) 25
(C) 30
(D) 20 and 25
(E) No mode
- Q6.** The average weight (in pounds) of 8 packages is 40. If two more packages with weights 30 and 50 pounds are added, what is the new average weight?
(A) 38
(B) 39
(C) 40
(D) 41
(E) 42
- Q7.** A transportation company has 6 buses with the following capacities: 30, 40, 50, 30, 40, 60. What is the capacity?
(A) 35
(B) 40
(C) 45
(D) 40
(E) 42
- Q8.** The following data set represents the number of passengers on 10 buses: 20, 25, 30, 20, 25, 30, 35, 20, 25, 30. Which measure of central tendency is most appropriate for this data set?
(A)
(B)
(C)
(D) Range
(E) None of the above

Open Ended Questions (FRQ)

- Q9.** The average delivery time for 8 packages is 4 hours. If 2 more packages with delivery times 3 and 5 hours are added, calculate the new average delivery time and compare it with the original average delivery time. Show all your work and explain your reasoning.
- Q10.** A logistics company has two branches with the following delivery times (in hours) for 5 packages: Branch A: 2, 3, 4, 5, 6 and Branch B: 1, 2, 3, 4, 7. Calculate and compare the , , and for the two branches. Show all your work and explain your reasoning.

Chef's Tips

- Tip 1: Review the concept of central tendency and the differences between mean, median, and mode.
- Tip 2: Make sure to read the questions carefully and choose the correct answer based on the context.
- Tip 3: For free response questions, show all work and explain reasoning to receive full credit.
