

Challenge (Habanero)

- Q1.** In a gaming survey, what percentage of gamers play both PC and Console?
(A) 20
(B) 30
(C) 40
(D) 50
(E) 60
- Q2.** A two-way table shows the number of gamers who prefer $x \cdot y$ or $y \cdot x$ as their favorite game mode. If 30 gamers prefer $x \cdot y$ and 20 prefer $y \cdot x$, what is the relative frequency of gamers who prefer $x \cdot y$?
(A) 0.6
(B) 0.7
(C) 0.8
(D) 0.9
(E) 1.0
- Q3.** What is the association between the variables 'gaming platform' and 'game genre' if 80
(A) No association
(B) Weak association
(C) Strong association
(D) Very strong association
(E) None of the above
- Q4.** A two-way table shows the relationship between the number of hours spent gaming and the gamer's age. If 40
(A) 40
(B) 50
(C) 60
- (D) 70
(E) 80
- Q5.** If a two-way table shows that 25
(A) 0.25
(B) 0.5
(C) 0.75
(D) 1.0
(E) 1.25
- Q6.** What can be concluded about the relationship between 'gaming platform' and 'game duration' if 30
(A) No relationship
(B) Weak positive relationship
(C) Strong positive relationship
(D) Weak negative relationship
(E) Strong negative relationship
- Q7.** A two-way table shows the number of gamers who prefer different genres of games on PC and Console. If 60
(A) 60
(B) 70
(C) 80
(D) 90
(E) 100
- Q8.** If 80
(A) 10
(B) 20
(C) 30
(D) 40
(E) 50

Open Ended Questions (FRQ)

- Q9.** A gaming company conducted a survey of 100 gamers. The results are shown in the two-way table below: | | PC | Console |
Total | | — | — | — | — | | $x \cdot y$ | 40 | 20 | 60 | | $y \cdot x$ | 15 | 25 | 40 | | Total | 55 | 45 | 100 | Calculate the relative frequency of gamers who prefer $x \cdot y$ on PC and $y \cdot x$ on Console.
- Q10.** Using the two-way table from question 9, analyze the association between the variables 'gaming platform' and 'game mode'. Provide evidence from the table to support your conclusion.

Chef's Tips

- Tip 1: Ensure students understand how to calculate relative frequencies from two-way tables.
- Tip 2: Remind students to consider the context of the problem when analyzing associations between variables.
- Tip 3: Encourage students to provide clear and concise explanations for their answers.
