### Open Ended Questions (FRQ)

**Q9.** Tom is planning a road trip from City A to City B. The distance between the two cities is 240 miles. If Tom's car gets an average of 30 miles per gallon, and gas costs

2.50

per gallon, how much will the gas cost for the trip?

**Q10.** The amount of time it takes to mow a lawn is inversely proportional to the number of people mowing. If it takes 4 people 2 hours to mow the lawn, how long will it take for 2 people to mow the lawn?

### Chef's Tips

1

- Make sure students show their work and explain their reasoning.
- Encourage students to use charts, graphs, and diagrams to visualize the problems.
- Remind students to check their units and make sure they are consistent throughout the problem.
