Open Ended Questions (FRQ)

Q9. A water tank can hold 1200 gallons of water. If 300 gallons of water are already in the tank, what percentage of the tank is filled? Show your work and explain your answer.

Q10. A company has 25 employees, with a ratio of 3 : 5 men to women. If 10 more employees are hired, with the same ratio of men to women, how many men and women will the company have in total? Show your work and explain your answer.

Chef's Tips

1

- Tip 1: Make sure students show their work and explain their reasoning.
- Tip 2: Encourage students to use cross-multiplication to solve proportions.
- Tip 3: Remind students to simplify their ratios and check their units.
