

Advanced (Habanero)

Open Ended Questions (FRQ)

Q9. Graph the function $y = 2f(x - 1) - 3$ if $f(x) = x^2$. Identify the transformations applied to the graph of $f(x)$.

Q10. Compare the graphs of $y = f(x)$ and $y = f(x + 2) - 1$. Describe the transformations that occur.

Chef's Tips

- Tip 1: Use graph paper to visualize transformations
- Tip 2: Identify the parent function before applying transformations
- Tip 3: Check for reflections, shifts, stretches, and compressions
