Open Ended Questions (FRQ)

Q9. Find the inverse of $f(x) =$

$\frac{1}{x+1}$. Show all steps and verify your answer using composition.

Q10. A city's population P (in thousands) can be modeled as a function of time t (in years) by $P(t) = 2t + 5$. Interpret the inverse function P^{-1} in the context of this problem, and find its equation.

Chef's Tips

- Read each question carefully before answering.
- Use the given space for free response questions.
- Verify your answers when possible.
