

Foundation (Jalapeno)

Open Ended Questions (FRQ)

Q9. Find the inverse of the function $f(x) = x^3 + 2$ and verify it using composition. Show all work.

Q10. A water tank can be filled at a rate of $f(x) = 2x$ gallons per minute, where x is the number of minutes. Find the inverse function that represents the amount of time it takes to fill the tank to x gallons. Interpret the result in the context of the problem. Show all work.

Chef's Tips

- Tip 1: Make sure to read each question carefully and choose the correct answer based on the given options.
- Tip 2: Use the given formulas and equations to find the inverse functions and verify the results using composition.
- Tip 3: Label all work clearly and show each step of the solution for free response questions.
