Open Ended Questions (FRQ)

Q9. Find the slope of the line passing through points $(3, 4)$ and $(6, 8)$, and interpret it as the rate of change. Show your work and provide a clear explanation.

Q10. Determine the equation of the line with a slope of -2 passing through the point $(1, 3)$. Graph the line and identify its x - and y -intercepts.

Chef's Tips

1

- Tip 1: Review the learning objectives to ensure understanding of key concepts.
- Tip 2: Use graph paper for free-response questions to help with graphing and calculations.
- Tip 3: Encourage students to show their work and provide clear explanations for free-response questions.
