

Advanced (Habanero)

Open Ended Questions (FRQ)

Q9. Find the equation of a line with a slope of -2 and passing through $(1, 3)$, then show the graph.

Q10. Suppose $y = 5x - 2$. Find

$\frac{dy}{dx}$, then describe what

$\frac{dy}{dx}$ means in the context of the problem.

Chef's Tips

- Tip 1: Encourage students to use the slope formula where applicable.
- Tip 2: Ensure students label all axes and title their graphs.
- Tip 3: Remind students to check their units of measurement when interpreting slope.
