

Foundation (Jalapeno)

Open Ended Questions (FRQ)

Q9. Solve the system of equations: $x + 2y = 7$ and $3x - 2y = 5$. Show your work and explain your answer in the context of the problem.

Q10. Tom has been saving money for a new bike and has 120 in his savings account. He wants to buy a bike that costs 180. If Tom's parents give him an allowance of 5 per week, how many weeks will it take him to have enough money to buy the bike? Show your work and explain your answer.

Chef's Tips

- Tip 1: Make sure students show their work for the free response questions
- Tip 2: Encourage students to use the substitution or elimination method to solve systems of equations
- Tip 3: Remind students to check their answers and explain their reasoning in the context of the problem
