

Unit: Unit 6: Systems of Linear Equations and Inequalities

Topic: Applications of Systems of Inequalities

Name: _____

Date: _____

Foundation (Jalapeno)

Open Ended Questions (FRQ)

Q9. A small business sells two types of shirts, casual and dress. Each casual shirt requires 4 of material and each dress shirt requires 6 of material. If the business has 120 worth of material and wants to make at least 60 in profit, with casual shirts selling for 10 each and dress shirt selling for 15 each, find the system of inequalities representing these constraints.

Q10. An investor has 10,000 to invest in two types of investments, stocks and bonds, with expected returns of 8

Chef's Tips

- Provide clear instructions for each question.
- Ensure students understand the concept of feasible regions.
- Encourage students to graph the inequalities on a coordinate plane.
