

Quiz (Carolina Reaper)

Open Ended Questions (FRQ)

Q9. Solve the system $x + 2y = 4$ and $3x - 2y = 5$ graphically. Show your work and explain your reasoning.

Q10. Graph the system $y = 2x + 1$ and $y = x - 2$. Identify the point of intersection and explain its significance in the context of the system.

Chef's Tips

- Emphasize the importance of accurate graphing and intersection point identification.
- Encourage students to use different colors or line styles to distinguish between the two equations.
- Remind students to check their work by plugging the intersection point back into both equations.
