

Unit: 6 Unit 8: Quadratics

Topic: Systems of Linear and Quadratic Equations

Name: _____

Date: _____

Advanced (Carolina Reaper)

Open Ended Questions (FRQ)

Q9. Solve the system: $x+2y = 4$, $y = x^2 - 2x + 1$ and find the point(s) of intersection. Sketch the graphs of both equations on the same axes and identify the solution(s).

Q10. Show that the system $y = x^2 - 4$, $y = 2x$ has two distinct real solutions and find the coordinates of the point(s) of intersection.

Chef's Tips

- Provide clear, step-by-step solutions for all problems
- Sketch the graphs for all problems where applicable
- Emphasize understanding of the concepts rather than just the solutions
