

Advanced (Habanero)

- Q1.** What is the mean of 2, 4, 6, 8, 10?
(A) 4
(B) 5
(C) 6
(D) 8
(E) 10
- Q2.** Which of the following is a measure of central tendency?
(A) Range
(B) Mode
(C) Variability
(D) Outlier
(E) Percentile
- Q3.** What is the median of 1, 3, 5, 7, 9?
(A) 3
(B) 5
(C) 7
(D) 9
(E) 11
- Q4.** A dataset has a mean of 10 and a median of 12. What can be said about the dataset?
(A) It is symmetric
(B) It is skewed to the left
(C) It is skewed to the right
(D) It has no mode
(E) It has an outlier
- Q5.** What is the mode of 2, 2, 2, 4, 4, 6, 6, 6, 6?
- (A) 2
(B) 4
(C) 6
(D) 8
(E) No mode
- Q6.** Two datasets have the same mean, but different medians. What can be said about the datasets?
(A) They are identical
(B) They are symmetric
(C) They are skewed in opposite directions
(D) They have the same range
(E) They have different ranges
- Q7.** A dataset has a median of 8 and a mode of 6. What can be said about the dataset?
(A) It is symmetric
(B) It is skewed to the left
(C) It is skewed to the right
(D) It has no mean
(E) It has an outlier
- Q8.** What is the difference between the mean and median of 1, 2, 3, 4, 5?
(A) 0
(B) 1
(C) 2
(D) 3
(E) 4

Open Ended Questions (FRQ)

- Q9.** Calculate the mean, median, and mode of the dataset 2, 4, 6, 8, 10, 12. Show your work and explain your answers.
- Q10.** Compare the measures of central tendency of two datasets: 1, 3, 5, 7, 9 and 2, 4, 6, 8, 10. Which dataset has a higher mean? Which dataset has a higher median? Explain your answers.

Chef's Tips

- Ensure students show their work for FRQs
- Encourage students to use calculators for mean calculations
- Remind students to check their units for consistency
