

Advanced (Habanero)

- Q1.** What is the primary purpose of a stem-and-leaf plot?
- (A) To display the mean of a dataset
 - (B) To show the distribution of a dataset
 - (C) To calculate the median of a dataset
 - (D) To create a box plot
 - (E) To graph a histogram
- Q2.** In a stem-and-leaf plot, what does the stem represent?
- (A) The ones digit of a number
 - (B) The tens digit of a number
 - (C) The first part of a number
 - (D) The last part of a number
 - (E) The decimal part of a number
- Q3.** Which of the following datasets would be most suitable for a stem-and-leaf plot?
- (A) A list of exam scores ranging from 0 to 100
 - (B) A list of cities with their corresponding populations
 - (C) A list of student names and their favorite colors
 - (D) A list of historical dates
 - (E) A list of chemical symbols
- Q4.** What can be inferred from a stem-and-leaf plot with a large number of entries in the leaf column?
- (A) The data is skewed to the left
 - (B) The data is skewed to the right
 - (C) The data is symmetric
 - (D) The data has a large range
 - (E) The data has a small standard deviation
- Q5.** In a stem-and-leaf plot, how are the leaves typically arranged?
- (A) In descending order
 - (B) In ascending order
 - (C) In alphabetical order
 - (D) In reverse alphabetical order
 - (E) Randomly
- Q6.** Which of the following is NOT a characteristic of a stem-and-leaf plot?
- (A) It displays the distribution of a dataset
 - (B) It shows the frequency of each value
 - (C) It is used for continuous data
 - (D) It can be used for categorical data
 - (E) It is a type of graph
- Q7.** What is the advantage of using a stem-and-leaf plot over a histogram?
- (A) It is easier to read
 - (B) It is more visually appealing
 - (C) It preserves the actual data values
 - (D) It is more suitable for large datasets
 - (E) It is less time-consuming to create
- Q8.** How do you determine the stem and leaf of a number in a stem-and-leaf plot?
- (A) The stem is the first digit and the leaf is the rest of the number
 - (B) The stem is the last digit and the leaf is the rest of the number
 - (C) The stem is the first part of the number and the leaf is the last part
 - (D) The stem is the decimal part and the leaf is the whole number part
 - (E) The stem is the whole number part and the leaf is the decimal part

Open Ended Questions (FRQ)

Q9. Construct a stem-and-leaf plot for the following dataset: 12, 15, 18, 20, 22, 25, 28, 30, 32, 35

Q10. Interpret the distribution of the following stem-and-leaf plot: Stem Leaf 2 0, 2, 5, 8 3 1, 5, 8 4 0, 3, 6

Chef's Tips

- Tip 1: Encourage students to use pencil and paper to create the stem-and-leaf plots
- Tip 2: Remind students to label the axes and title the plot
- Tip 3: Suggest that students use a ruler to draw the plot
