

Advanced (Habanero)

- Q1.** What is the purpose of a stem-and-leaf plot?
(A) To display the mean of a dataset
(B) To display the median of a dataset
(C) To compare distributions of two datasets
(D) To display the distribution of a dataset
(E) To calculate the standard deviation of a dataset
- Q2.** Which of the following is a benefit of using a stem-and-leaf plot?
(A) It can only be used with small datasets
(B) It is difficult to compare distributions
(C) It can be used to display outliers
(D) It is only used for discrete data
(E) It is not useful for skewed distributions
- Q3.** What is the stem in a stem-and-leaf plot?
(A) The leaves of the plot
(B) The numbers on the left side of the plot
(C) The numbers on the right side of the plot
(D) The title of the plot
(E) The legend of the plot
- Q4.** Which of the following datasets would be best represented by a stem-and-leaf plot?
(A) The number of goals scored by a soccer team in a season
(B) The heights of students in a class
(C) The number of hours studied by students for an exam
(D) The scores on a math test
(E) The number of siblings of students in a class
- Q5.** How do you determine the stem of a stem-and-leaf plot?
(A) By looking at the median of the dataset
(B) By looking at the mode of the dataset
(C) By looking at the first digit of each number
(D) By looking at the last digit of each number
(E) By looking at the range of the dataset
- Q6.** What is the leaf in a stem-and-leaf plot?
(A) The numbers on the left side of the plot
(B) The numbers on the right side of the plot
(C) The title of the plot
(D) The legend of the plot
(E) The numbers that are paired with the stem
- Q7.** Which of the following is an example of a stem-and-leaf plot?
(A) A bar graph
(B) A histogram
(C) A box plot
(D) A plot with numbers on the left and right sides
(E) A scatter plot
- Q8.** What can be inferred from a stem-and-leaf plot about the distribution of a dataset?
(A) The mean of the dataset
(B) The median of the dataset
(C) The mode of the dataset
(D) The shape of the distribution
(E) The range of the dataset

Open Ended Questions (FRQ)

- Q9.** Construct a stem-and-leaf plot for the following dataset: {12, 15, 18, 20, 22, 25, 30, 32, 35, 40}. Use the tens digit as the stem and the ones digit as the leaf.
- Q10.** Interpret the distribution of the dataset in the stem-and-leaf plot you constructed in question 9. Describe the shape of the distribution and any outliers or patterns you observe.

Chef's Tips

- Tip 1: Emphasize the importance of accurate construction of stem-and-leaf plots.
- Tip 2: Encourage students to interpret the distribution of the dataset from the stem-and-leaf plot.
- Tip 3: Remind students to check their work for errors and completeness.
