Open Ended Questions (FRQ)

- Q9.** Tom has 18 boxes of pens, and each box contains 12 pens. What is the GCF and LCM of 18 and 12? Show your work and explain your reasoning.
- Q10.** Ashley is planning a road trip that is 240 miles long. If she drives 16 miles per hour, how many hours will it take her to complete the trip? Use GCF and LCM to help you solve the problem.

Chef's Tips

- Remind students to use prime factorization to find GCF and LCM.
- Encourage students to use real-world examples to illustrate their understanding of GCF and LCM.
- Make sure students show their work and explain their reasoning for FRQs.
