

Advanced (Carolina Reaper)

Open Ended Questions (FRQ)

Q9. Graph the solution to the inequality $2x - 5 > 11$ on a number line, and write the solution in interval notation. Show all work and explain your answer.

Q10. Solve the inequality $x/4 + 2 > 5$, and graph the solution on a number line. Write the solution in interval notation and provide a brief explanation.

Chef's Tips

1

- Ensure students have a graphing calculator to visualize the solutions.
- Remind students to check their work and provide explanations for their answers.
- Encourage students to use different methods to solve the inequalities, such as graphing and algebraic manipulation.
