### Open Ended Questions (FRQ)

**Q9.** The Great Pyramid of Giza is approximately 146.5 meters tall. If it was built in 20 years, and each year the pyramid grew by a certain number of meters, find this number.

**Q10.** A time capsule buried in 2000 is to be opened in 2060. How many years will it take for the capsule to be opened after it was buried, assuming the time is counted from 2000 as year 0?

### Chef's Tips

- Check for accurate calculations and correct units.
- Ensure all work is shown for free response questions.
- Be mindful of sign errors when working with negative integers.
