Open Ended Questions (FRQ)

Q9. Determine the domain of the function $(f/g)(x)$ where $f(x) = x^2 - 4$ and $g(x) = x - 2$. Show your work and explain your reasoning.

Q10. A savings account earns interest according to $f(x) = 100 + 0.05x$ and a competitor's account earns interest according to $g(x) = 50 + 0.1x$. Simplify the expression $(f - g)(x)$. What does this simplified expression represent in the context of the savings accounts? Use x to represent the number of years.
