

Challenge (Habanero)

Open Ended Questions (FRQ)

Q9. In a forest, the population of deer increased from 120 to 150 over a 2-year period. What is the average annual percent increase in the deer population? Show your work and calculate the answer as a percent.

Q10. A hiker is planning a trip that is 30 miles long. If she has already hiked 20

Chef's Tips

- Tip 1: Ensure students understand the concept of percentages and how to apply them to real-world problems.
- Tip 2: Encourage students to show their work and explain their reasoning for each problem.
- Tip 3: Remind students to check their units and ensure they are answering the question being asked.
