

Challenge (Habanero)

Open Ended Questions (FRQ)

- Q9.** In a gaming tournament, the ratio of players using *PS5* to players using *Xbox* is 2 : 3. If 80 players are using *Xbox*, and 48 players are using *PS5*, how many players are participating in the tournament in total? Show your work and explain your reasoning.
- Q10.** A gamer wants to buy in-game currency with a ratio of 5 : 2 for *gold* : *credits*. If they have 36 credits and want to buy the same amount of gold as credits, how many gold can they buy? Use proportions to solve the problem and show your work.

Chef's Tips

- Remind students to check their work using inverse operations.
- Encourage students to use visual models to represent ratios and proportions.
- Allow students to use calculators for calculations, but not for solving proportions.
