Open Ended Questions (FRQ)

- Q9.** The distance between a tennis player and the net is x meters. If x can be -5 , 0 , or 5 , what are the possible distances from the player to the net? Show your work and explain your reasoning.
- Q10.** A baseball team wins a game with a score of $|2x - 3|$ runs, where x is the number of home runs. If the team scores 5 runs, what is the value of x ? Use the definition of absolute value to solve the equation and explain your work.

Chef's Tips

- Remind students that absolute value represents distance from zero on the number line.
- Encourage students to use real-world examples, such as sports scores, to illustrate the concept of absolute value.
- Emphasize the importance of considering both positive and negative solutions when working with absolute value equations.
