

Unit: Unit 4: Absolute Value
Topic: Definition of Absolute Value

Name: _____

Date: _____

Homework (Habanero)

Open Ended Questions (FRQ)

Q9. A patient's blood pressure is 15 points above the normal blood pressure of 120. If the patient's blood pressure drops by 3 points per hour, what is the absolute value of the difference between the patient's blood pressure and the normal blood pressure after 4 hours? Show your work and explain your answer.

Q10. The growth rate of a tumor is 2 cells per hour. If the initial size of the tumor is -10 cells, what is the absolute value of the tumor size after 5 hours? Explain how you used absolute value to solve this problem.

Chef's Tips

- Chef's Tips
- Please ensure students show their work for FRQs
- Use a ruler to draw number lines for visualizing absolute value
