

Unit: Unit 5: Linear Equations

Topic: Point-Slope Form, Slope-Intercept Form, Standard Form and Converting Forms

Name: _____

Date: _____

Quiz (Habanero)

Open Ended Questions (FRQ)

Q9. A weather forecast model is given by the equation $y = -\frac{2}{3}x + 5$, where y is the temperature in degrees Celsius and x is the number of hours since midnight. Graph this line and find the x - and y -intercepts.

Q10. A linear equation in standard form is $x + 2y = 9$. Convert this equation to slope-intercept form and point-slope form. Graph the line and find the x - and y -intercepts. Explain the meaning of the slope and y -intercept in the context of a pollution model.

Chef's Tips

1

- Tip 1: Make sure students understand the context of the problem
- Tip 2: Encourage students to use graphing calculators to visualize the lines
- Tip 3: Emphasize the importance of labeling axes and intercepts
