

**Advanced (Carolina Reaper)****Open Ended Questions (FRQ)**

**Q9.** Solve the system of equations:  $2x + 3y = 12$  and  $x - 2y = -3$ . What is the value of  $x$  and  $y$ ?

**Q10.** A bakery sells a combination of bread and pastries. The baker can make  $x$  loaves of bread and  $y$  pastries per hour. The profit from bread is  $2x$  dollars and the profit from pastries is  $3y$  dollars. If the baker works for 4 hours and makes a total profit of 240, and the ratio of bread to pastries is 3:2, what is the value of  $x$  and  $y$ ?

**Chef's Tips**

1

- Tip 1: Review the instructions carefully
- Tip 2: Use the given equations to solve for the unknowns
- Tip 3: Check your answers for reasonableness
