

Foundation (Jalapeno)

Open Ended Questions (FRQ)

Q9. A company produces two products, A and B , with production costs of

50

and

75

per unit respectively. The company has a budget of

3000

for production. If they want to produce at least 20 units of A and at least 15 units of B , find the constraint on the number of units produced, x and y , and interpret the feasible region.

Q10. An investor has

2000

to invest in two stocks, X and Y , with expected returns of 8

Chef's Tips

1

- Tip 1: Ensure students understand the context of the problems.
- Tip 2: Remind students to use the given information to model the constraints.
- Tip 3: Encourage students to interpret the feasible region in the context of the problem.
