

Challenge (Habanero)**Open Ended Questions (FRQ)**

Q9. Solve the system of equations: $x + 2y = 8$, $3x - 2y = 4$. Show all work and explain your reasoning. What is the value of x and y ?

Q10. A group of friends are planning a camping trip. The cost of the campsite is x dollars and the cost of food is y dollars. If the total cost is 500 and the cost of the campsite is $0.3y + 100$, what system of equations represents this situation? Solve the system and find the value of x and y . Show all work and explain your reasoning.

Chef's Tips

- Read each question carefully and choose the correct answer.
- Use the elimination or substitution method to solve systems of equations.
- Show all work and explain your reasoning for free response questions.
