

Unit: 6 Unit 6: Systems of Linear Equations and Inequalities

Topic: Solving Systems Using Elimination and Substitution

Name: _____

Date: _____

Advanced (Carolina Reaper)

Open Ended Questions (FRQ)

Q9. Tom has been saving money for a new bike and has 120 in his savings account. He wants to buy a bike that costs 180. Tom's parents have agreed to give him an allowance of 5 per week for doing chores. How many weeks will it take Tom to have enough money to buy the bike? Show your work.

Q10. A small business sells two types of products: A and B. Product A costs 10 and product B costs 15. The business has a budget of 150 for advertising. If the cost of advertising product A is 2 per ad and the cost of advertising product B is 3 per ad, how many ads for each product can the business run? Show your work.

Chef's Tips

- Provide feedback on problem-solving strategies
- Encourage students to use graphs to visualize systems
- Remind students to check their solutions by plugging them back into the original equations
