Open Ended Questions (FRQ)

Q9. Graph the system of inequalities $y > x - 2$ and $y < -x + 4$. Shade the solution region. What is the area of the solution region?

Q10. A company produces two products: Product A and Product B. The profit from Product A is $3x$ and the profit from Product B is $2y$. The total profit is greater than 2000. Graph the system of inequalities $3x + 2y > 2000$ and $x + y < 100$. Shade the solution region. What is the maximum profit?

Chef's Tips

1

- Tip 1: Ensure students understand the concept of graphing inequalities on the same coordinate plane
- Tip 2: Emphasize the importance of identifying overlapping solution regions
- Tip 3: Remind students to interpret feasible regions in the context of the problem
