

Unit: 6 Unit 8: Quadratics

Topic: Systems of Linear and Quadratic Equations

Name: _____

Date: _____

Homework (Habanero)

Open Ended Questions (FRQ)

Q9. Solve the system of equations: $y = 3x - 2$ and $y = x^2 + x - 1$. Find x and y .

Q10. A quadratic function $y = x^2 + 2x - 3$ models the spread of a disease. A linear function $y = x + 1$ models the recovery rate. Find their intersection points.

Chef's Tips

1

- Ensure students show all steps for FRQs
- Encourage the use of graphing calculators to check answers
- Have students interpret the results in context
