

Foundation (Jalapeno)

Open Ended Questions (FRQ)

Q9. A stock's prices for 5 days are 20, 25, 30, 20, 25. Find the mean, median, and mode. Compare the three measures.

Q10. A company's profits for 4 years are 10000, 12000, 15000, 18000. Find the mean and median. Interpret the results in the context of the company's financial performance.

Chef's Tips

- Tip 1: Ensure students understand the concept of central tendency
- Tip 2: Emphasize the importance of context in interpreting results
- Tip 3: Encourage students to compare data sets using different measures
