

Foundation (Jalapeno)

- Q1.** What is the mean of 2, 4, 6, 8, 10?
(A) 4
(B) 5
(C) 6
(D) 7
(E) 8
- Q2.** A basketball player scored 12, 18, 15, 20, 22 points in five games. What is the median score?
(A) 15
(B) 17
(C) 18
(D) 19
(E) 20
- Q3.** What is the mode of 3, 5, 3, 7, 3, 9?
(A) 3
(B) 5
(C) 7
(D) 9
(E) No mode
- Q4.** A cyclist rode 15, 20, 18, 22, 25 miles on five days. What is the mean distance?
(A) 18
(B) 19
(C) 20
(D) 21
(E) 22
- Q5.** A set of exam scores has a mean of 80 and a median of 82. Which statement is true?
(A) The data is symmetric
(B) The data is skewed to the left
(C) The data is skewed to the right
(D) The mode is 82
(E) The range is 20
- Q6.** What is the median of 11, 13, 17, 19, 23?
(A) 13
(B) 15
(C) 17
(D) 19
(E) 21
- Q7.** A golfer's scores for four rounds are 72, 75, 80, 78. What is the mode?
(A) 72
(B) 75
(C) 78
(D) 80
(E) No mode
- Q8.** A set of numbers has a mean of 10 and a range of 20. What is the smallest possible value?
(A) 0
(B) 5
(C) 10
(D) 15
(E) 20

Open Ended Questions (FRQ)

- Q9.** A runner recorded the following times for 5 miles: 35, 32, 38, 30, 36 minutes. Calculate the mean, median, and mode. Compare the measures of central tendency.
- Q10.** A volleyball team scored the following points in 6 games: 18, 22, 20, 25, 18, 22. Calculate the mean, median, and mode. Interpret the results in context.

Chef's Tips

- Tip 1: Emphasize the importance of context when interpreting central tendency
- Tip 2: Use real-world examples to illustrate the differences between mean, median, and mode
- Tip 3: Encourage students to visualize the data when comparing measures of central tendency
