

Advanced (Carolina Reaper)**Open Ended Questions (FRQ)**

Q9. A book club has 7 members who read 3, 5, 2, 6, 4, 7, and 1 books per month. Calculate the mean, median, and mode of the number of books read per month. Show your work and explain your answers.

Q10. A store tracks the number of customers who enter the store each day for a week. The data is as follows: 25, 30, 20, 35, 28, 32, and 29. Calculate the mean, median, and mode of the data. Then, compare the data sets from two different weeks and discuss any differences or similarities in the measures of central tendency.

Chef's Tips

- Ensure students show all work and explanations for FRQs
- Allow students to use calculators for calculations
- Emphasize the importance of interpreting results in context
