

Homework (Jalapeno)

- Q1.** The height of ancient Egyptian pyramids had a *mean* of 100 meters. If the heights were 90, 100, 110, 120, and 130 meters, what was the *median* height?
(A) 100
(B) 110
(C) 105
(D) 108
(E) 112
- Q2.** In the ancient city of Pompeii, the number of *coins* found in 5 different jars were 10, 15, 20, 25, and 30. What is the *mode* of this dataset?
(A) 10
(B) 15
(C) 20
(D) There is no mode
(E) 25
- Q3.** A Greek philosopher measured the *time* it took for 5 students to complete a task. The times were 10, 12, 15, 18, and 20 minutes. What is the *mean* time?
(A) 12
(B) 13
(C) 14
(D) 15
(E) 16
- Q4.** The *distance* traveled by Roman soldiers in a day were 20, 22, 25, 28, and 30 kilometers. What is the *median* distance?
(A) 22
(B) 24
(C) 25
(D) 26
(E) 28
- Q5.** The *weight* of ancient artifacts found in a museum were 5, 10, 15, 20, and 25 kilograms. If the *mean* weight is 15 kilograms, what is the *mode*?
(A) 5
(B) 10
(C) 15
(D) There is no mode
(E) 20
- Q6.** In the ancient Olympic Games, the *number* of *wins* by 5 different athletes were 2, 4, 6, 8, and 10. What is the *mean* number of wins?
(A) 4
(B) 5
(C) 6
(D) 7
(E) 8
- Q7.** A historian recorded the *number* of *years* it took for 5 different civilizations to build their capitals. The times were 10, 20, 30, 40, and 50 years. What is the *median* time?
(A) 20
(B) 25
(C) 30
(D) 35
(E) 40
- Q8.** The *height* of 5 different ancient statues were 150, 160, 170, 180, and 190 centimeters. If the *mean* height is 170 centimeters, what is the *mode*?
(A) 150
(B) 160
(C) 170
(D) There is no mode
(E) 180

Open Ended Questions (FRQ)

- Q9.** The *length* of the sides of 5 different ancient triangles were 5, 6, 7, 8, and 9 meters. Calculate the *mean*, *median*, and *mode* of the dataset and compare the measures of central tendency. Provide your answers with [answer].
- Q10.** A archaeologist discovered 5 ancient vases with the following *weights*: 10, 12, 15, 18, and 20 kilograms. Calculate the *mean*, *median*, and *mode* of the weights. Interpret the results in the context of the ancient civilization. Provide your answers with [answer].

Chef's Tips

- Tip 1: Ensure students understand the concept of central tendency
- Tip 2: Emphasize the importance of context in data interpretation
- Tip 3: Encourage students to use calculators to verify their calculations
