

Challenge (Habanero)

- Q1.** The heights of 5 bookshelves in a library are 62, 65, 68, 70, 72 inches. What is the stem in a stem-and-leaf plot for these heights?
(A) 6
(B) 60
(C) 7
(D) 70
(E) 65
- Q2.** A recipe for cake requires 23, 25, 27, 29, 31 ounces of sugar. What is the leaf for the value 27 in a stem-and-leaf plot?
(A) 2
(B) 3
(C) 5
(D) 7
(E) 9
- Q3.** The lengths of 5 wooden planks are 43, 45, 47, 49, 51 inches. What is the median of these lengths when presented in a stem-and-leaf plot?
(A) 45
(B) 47
(C) 49
(D) 51
(E) 43
- Q4.** A chef has 15, 18, 20, 22, 25 minutes to prepare meals. What is the range of these times in a stem-and-leaf plot?
(A) 10
(B) 12
(C) 15
(D) 18
(E) 20
- Q5.** The prices of 5 tools are 15.50, 16.25, 17.00, 17.75, 18.50 dollars. What is the stem for the tool with price 17.00 in a stem-and-leaf plot?
(A) 15
(B) 16
(C) 17
(D) 18
(E) 19
- Q6.** A builder measured the widths of 5 windows as 35.2, 36.5, 37.8, 39.1, 40.4 inches. What is the leaf for the width 37.8 in a stem-and-leaf plot?
(A) 2
(B) 5
(C) 7
(D) 8
(E) 9
- Q7.** The cooking times for 5 meals are 8.2, 9.5, 10.8, 12.1, 13.4 minutes. What is the median of these times when presented in a stem-and-leaf plot?
(A) 9.5
(B) 10.8
(C) 12.1
(D) 13.4
(E) 8.2
- Q8.** A chef has a list of 5, 8, 12, 15, 18 minutes to prepare meals. What is the mode of these times in a stem-and-leaf plot?
(A) 5
(B) 8
(C) 12
(D) 15
(E) No mode

Open Ended Questions (FRQ)

- Q9.** The lengths of 7 wires are 25, 27, 30, 32, 35, 37, 39 inches. Create a stem-and-leaf plot to represent these lengths and find the median.
- Q10.** A recipe book has the following page numbers with recipes: 12, 18, 20, 25, 30, 32, 38. Create a stem-and-leaf plot to represent these page numbers and find the range.

Chef's Tips

- Ensure students understand how to create stem-and-leaf plots
- Emphasize the importance of correct stem and leaf identification
- Allow students to use calculators for calculations, but not for creating stem-and-leaf plots
